

LABORATORY TECHNICIAN

Cosmetics (Based at RAHN UK
laboratory on the campus of
University of East London)

Founded in 1940, based in Switzerland and family-owned RAHN-Group is renowned for exceptional products and outstanding innovative solutions. We are internationally active on the market with speciality chemicals for EnergyCuring, with high-quality active ingredients and special products for the Cosmetic and the Scent & Taste industry. Years of experience, know how and competent technical support made us a leading provider in the market. To complete our Cosmetics division we are looking for a highly motivated and dedicated person.

Your main Accountabilities

To develop innovative guide formulations, including production of samples for exhibitions and to support sales. Stability testing and organization of suitable packaging will also be part of your responsibility in addition to appropriate documentation of those formulations.

Your profile

- Scientific background with experience working in a laboratory/technical support/cosmetic product development environment
- Excellent and efficient communication skills in English
- Ability to work independently

We offer

- Competitive salary package
- Exciting challenge within a motivated team
- Opportunity to develop cosmetic formulation experience in a wide application field
- Implementation of own ideas and creativity

We look forward to receiving the details of your application.
